

Media Management Suite

Essential for motion imagery processing

UNMANNED AIRCRAFT SYSTEMS

Insitu's Media Management Suite (MMS) of processing software gives you the most from your still and motion imagery, delivering actionable intelligence for today's warfighter.

Capabilities include: rapid video review; visual enhancements; event logging; and standard-compliant, bandwidth-flexible media distribution

KEY BENEFITS & FEATURES

TacitView™

Motion imagery media exploitation

Maximizes an analyst's productivity, providing powerful full motion video editing, enhancement, exploitation and reporting tools. Find, scrub, view, improve, tag, edit, annotate and publish motion imagery, metadata and other data sources across the enterprise during all phases of exploitation.

Catalina™

Motion imagery media engine

Powers your metadata-rich media processing, storage, exploitation and dissemination operations. Integrates seamlessly with other MMS software and can be used on its own or in conjunction with other media processing, storage and exploitation systems.

ASSEMBLE for maximum efficiency

Collect, synchronize, and archive standards compliant data sets for mission workflow

PROCESS manually or automatically

Enhance imagery and/or metadata for better accuracy/interpretation and workflows

ASSESS for quick decision making

Improved comprehension of live and archived synchronized data to correlate observed activities

DELIVER in common formats to all user levels

Mission tailored, reliable, derived information using open standards for maximum interoperability

Software is classified as EAR99 and exportable for use across coalition operations.

Media Management Suite

Mission coordination and media mastery
for optimal decision support

MMS enables every operational layer, ensuring DoD/
STANAG-compliant media provides high-levels of utility
to end-users.

MMS BUNDLES

Operator / Mission Coordinator

- 3D geospatial viewer
- Store, search, retrieve, review
- Improve video
- Improve accuracy
- Annotate/burn in tags
- Rapidly create products/reports
- H.265 viewing
- Single user

Mission Intelligence Coordinator Upgrade

- Still Image and Video Mosaicking
- 3D Modeling
- H.265 feed encode, decode, transcode
- Additional user

MMS LICENSED FEATURE OPTIONS

Our baseline suite can be supplemented with additional licensed features to meet your needs.

TacitView™

- Baseline
- Annotation
- Catalina Connector
- Customer Plug-ins
- GEOINT Viewer
- Product Creation
- Still Image Georectification
- Still Image Mosaicking
- Visual Enhancements
- Local On-Screen Metadata Editor
- Local Archive
- HEVC Codec
- Lightspeed

Catalina™

- Baseline
- Video Transcoding
- Metadata Transcoding
- Metadata Guard
- Catalog and Archive
- Federation
- Geospatial Data Export
- Visual Enhancements
- On-Screen Metadata Inpainting
- On-Screen Metadata Redacting
- On-Screen OCR
- On-Screen Metadata Burn-In
- Annotation
- Reticle RT
- Reticle TGT
- Video Mosaicking
- 3D Reconstruction
- Still Image Mosaicking
- HEVC Codec
